Labycare-ECG Machine 12 Channel With USB (SKSS-IE15)

ECG Machine 12 Channel With USB Manufacturer by LABYCARE

Description :

ECG Machine is known as Electrocardiogram

ECG Leads are attached to the skin on arms, legs and chest using sticky patches.These leads read signals from heart and send this information to the electrocardiograph.

Simultaneous acquisition of 12-lead ECG data,real-time recording

10.2" Inch LCD Color Display

Graphic display of 12-lead ECG waveform

Built-in analysis software of age which assures accurate an alysis result

Auto-measurement, auto-interpretation, waveform play back and storage of ECG data.

Patients Information Can be Input

Lead off & lack off paper detection function.

DataTransmitting to PC Via RS232 /USB

USB Flash Disk & SD Memory, PC Review & Print

Heart rate measurement and pace-maker protection circuit

Multi-printing formats : manul / automatic, standard 12 channel, 3 channel ph is 3 rhythm lead , 6 channel , 6 channel plus rhythm

AC , DC or built-in lithium battery power supply , alarm of battery weak and lead-off

Paper Size : 210mm X 20m

RS 232 and USB interface cope with data-share or remote data management requirement (Optional)

We are Exporters and Suppliers of ECG Machine 12 Channel With USB at wholesale competitive prices from India.
