# Labycare-Stethoscope Teaching (SKSS-DP0085)

Stethoscope Teaching Manufacturer by **LABYCARE** in India.

**Description :**

Labycare Stethoscope Teaching is an acoustic medical instrument used to hear sounds made by the heart, lungs, and intestines. It typically has a small disc-shaped resonator that is placed against the chest, and two tubes connected to earpieces. It is often used to listen to lung and heart sounds.

Stethoscope Teaching has 2 frames attached to one chest piece.

Using a stethoscope to hear sounds is called auscultation

Stethoscopes have earpieces, which aid comfort and create a seal with the ear, improving the acoustic function of the device.

We are Manufacturer, Exporters and Suppliers of Stethoscope Teaching at wholesale competitive prices from India.
