Labycare-Brodie Universal Levers (SKSS-MD2008)

Brodie Universal Levers Manufacturer by LABYCARE

Description :

Brodie universal lever is a precision instrument used in physiology experiments to record movements of muscles, heart, or organs. It amplifies small mechanical changes into measurable recordings on kymographs. Widely used in laboratories, it ensures accurate and sensitive recording of biological responses under controlled experimental conditions.

Specifications :

Material: Aluminium / Stainless Steel
Type: Universal Lever
Mounting: Stand compatible
Usage: Muscle/organ movement recording

Finish: Polished and rust-resistant
