Labycare-Electrical Colour Mixer (SKSS-MD2037)

Electrical Colour Mixer Manufacturer by LABYCARE

Description :

Electrical colour mixer is a motorized device used to demonstrate color mixing by rotating colored discs at controlled speeds. It enables uniform blending of colors to produce white or intermediate shades. Commonly used in laboratories and classrooms, it provides accurate and repeatable results for studying light and color principles.

Specifications :

Type: Motorized color mixer
Operation: Electric motor driven
Speed Control: Adjustable rotation speed
Material: Metal/plastic disc with color segments
Power Supply: 220–230V AC, 50/60 Hz
Mounting: Table/stand mounted
