

Labycare-Measuring Tape (SKSS896)

Measuring Tape

Description :

Measuring Tape

Specifications : SPECIFICATION:

- **GET IT RIGHT FIRST TIME** – Reduce expensive measurement errors with this clear, easy to read Boxiki tape measure. Large size numbers and a dual-calibrated measuring tape make it easy to get the right reading every time. Reaching 16ft (192in / 5m / 500cm) this tape measure is ideal for professional jobs and DIY.
- **USE SOLO OR EVEN ONE HANDED** – Designed to be easy to use, this Boxiki tape measure has a smooth sliding nylon-coated blade, easy to use auto-lock function, and reliable rubber grip. The magnetic hook will stick to metals or hook over a ridge, making it easy to take measurements when you're alone.
- **SHATTERPROOF** – We don't recommend dropping your Boxiki measuring tape off a roof, but if you do, well, they've survived worse. With a shatterproof, shock absorbent, solid rubber case, the tape measure body and extra tough steel blade are designed to survive the rough and tumble of real-world building work.
- **ALWAYS ON HAND** – With a wrist strap and belt clip built in, you can hang this tape measure on a hook, hook it onto a tool rack, clip it to your clipboard or bag, or even swing it from your wrist or wear it on your belt. From the office to the site to the workshop to your home garage, it's always ready.
