

Labycare-Center Dissecting, Two Areas for Cart (SKSSCD230)

The Center Dissecting Table with dual cart areas is a robust stainless-steel unit designed for autopsy and dissection. It features a central working platform with two designated spaces for carts, ensuring organized handling, easy cleaning, and efficient workflow in medical, forensic, and research applications.

Description :

Model No:- **SKSSCD230**

The Center Dissecting Table with dual cart areas is designed to support efficient autopsy and dissection procedures. Constructed from durable, corrosion-resistant stainless steel, it offers a hygienic and easy-to-clean surface. The table features a central dissecting platform with two designated spaces beneath for accommodating carts, ensuring smooth workflow and organized handling of instruments, specimens, or remains. Its ergonomic design provides ample working area, stability, and convenience for pathologists and technicians in medical, forensic, or educational settings.
