

Labycare-Autoclave Wing Nut Non Electric (SKSSAS010)

Autoclave Wing Nut Non Electric Manufacturer by LABYCARE

Description :

Model No:SKSSAS010

The Autoclave Wing Nut Non Electric is a reliable and durable sterilizer designed for efficient steam sterilization in hospitals, laboratories, clinics, and rural healthcare centers. Constructed from high-quality stainless steel or aluminum, it features a heavy-duty wing nut locking system that ensures airtight sealing and safe operation. Unlike electric models, it operates using external heating sources such as gas, kerosene, or stoves, making it ideal for regions with limited or no electricity supply. With a working pressure of 15–20 psi, it guarantees effective sterilization of surgical instruments, dressings, glassware, and laboratory materials. Portable, economical, and easy to use, it offers consistent performance..
