

Labycare-Horizontal Steam Autoclave Fully Automatic Cylindrical
(SKSSAS024)

Horizontal Steam Autoclave Fully Automatic Cylindrical Manufacturer by LABYCARE

Description :

Product Cat # SKSSAS024

The Horizontal Steam Autoclave Fully Automatic Cylindrical model is a high-performance sterilization unit engineered for hospitals, pharmaceutical industries, and research laboratories. Designed with a robust stainless-steel cylindrical chamber, it ensures uniform steam penetration and efficient sterilization of instruments, dressings, and glassware. The fully automatic system controls temperature, pressure, and sterilization time with precision, ensuring consistent results without manual intervention. Equipped with advanced safety features like automatic pressure release, door interlock, and low-water protection, it guarantees safe operation. Built for durability, reliability, and efficiency, this autoclave meets international sterilization standards for professional laboratory and medical applications.
