

Labycare-C Vein Finder (SKSS-BCE045)

C Vein Finder Manufacturer by LABYCARE

Description :

A C Vein Finder is an advanced, non-invasive device designed to accurately locate veins using infrared technology. It projects clear vein images onto the skin, supporting faster and safer venipuncture. It is suitable for routine clinical use, emergency care, and difficult venous access cases.

Specifications :

Infrared (NIR) vein visualization technology

Real-time vein projection on skin surface

Non-invasive, safe, and radiation-free

Adjustable brightness and contrast modes

Compact, portable, and easy to operate

Suitable for pediatric, adult, and geriatric patients
