

Labycare-Blood Transfusion Chair (SKSS991)

Blood Transfusion Chair Manufacturer By LABYCARE

Description :

A Blood Transfusion Chair is a comfortable, adjustable seating unit designed for donors and patients receiving blood transfusions. It provides ergonomic support, safety features, and easy access for healthcare staff during procedures, enhancing comfort and reducing fatigue during extended transfusions or donation sessions.

Specifications :

- Ergonomic, padded seating with adjustable backrest
- Armrests for donor/patient support and needle access
- Durable, easy-to-clean upholstery
- Stable frame with anti-skid legs
- Foldable or reclining options available
- Suitable for blood banks, hospitals, and clinics
