

Labycare-Ultrasound Gel Transparent (SKSS-XRP059)

Ultrasound Gel Transparent Manufacturer by LABYCARE

Description :

Ultrasound Gel is water based. It is typically clear and thick, but not uncomfortably sticky. When it is applied to the skin, it doesn't dribble or drip off. It adheres to the skin lightly until it is wiped off at the end of the procedure.

It is conductive medium that is used in ultrasound diagnostic techniques and treatment therapies.

For any ultrasonic examination ultrasound gel is required to make connection of sonic plate to the body. The Gel provides friction-less film without air bubbles for sound waves to penetrate body.

The gel helps in removing of air or oil that may distort transmission of ultrasound waves. Oils restrict the waves.

It is placed on the patient's skin at the beginning of the ultrasound examination or therapy.

Ultrasound Gel is very safe to skin.

No toxic and irritant effect on the skin.

We are Manufacturer, Exporters and Suppliers of Ultrasound Gel Transparent at wholesale competitive prices from India.
