

Labycare-4 Body Mortuary Chamber (SKSS-MC4)

A **Mortuary 4 Body Cold Storage Cabinet** is a reliable preservation unit designed for hospitals, forensic labs, and medical institutions. Built with a robust stainless steel structure, it houses four individual compartments, each with insulated doors for hygienic and secure storage. The chamber maintains temperatures between -2°C to -5°C for short-term and up to -20°C for long-term preservation. High-density PUF insulation ensures energy efficiency, while the hermetically sealed compressor and CFC-free refrigerant deliver consistent cooling. A digital temperature controller with display provides precise monitoring. Optional heavy-duty casters allow mobility, making this unit an essential solution for modern mortuary facilities.
