

Labycare-2 Body Mortuary Chamber (SKSS-MC2)

A Mortuary 2 Body Cold Storage Cabinet

Description :

A **Mortuary 2 Body Cold Storage Cabinet** is a compact and efficient solution for preserving cadavers in hospitals, mortuaries, and forensic departments. Designed with high-quality stainless steel, it features two separate insulated compartments with individual doors for hygienic storage. The system maintains temperatures from -2°C to -5°C for short-term use and up to -20°C for extended preservation. Equipped with high-density PUF insulation, a hermetically sealed compressor, and CFC-free refrigerant, it ensures reliable performance and energy efficiency. A digital temperature controller with display allows precise monitoring. This unit combines durability, safety, and convenience for professional mortuary applications.

Specifications :

Product Details:

Usage/Application	Hospital
Brand	LABYCARE
Material	Stainless Steel
Size	2550x850x750 mm
Power Source	Electric
Voltage (V)	220 V
Color	Blue/ White/ Many
Temperature Range Degree Celsius	-15 DegreeC to 10
Frequency (Hz)	50 Hz
Product Dimensions (length x breadth x height)	2080x810x1975 mm
Is It Lockable	yes
Compressor Unit	18 Degree Celsius

Features:

- Robust construction
- Rust proof body
- Highly durable
