

## Labycare-Endotracheal Tube Plain Elastomer Coated (SKSS-MD05)

Endotracheal Tube Plain Elastomer Coated Manufacturer by LABYCARE

### **Description :**

Endotracheal Tube is also known as ET Tube.

ET Tube is used to maintain a patient airway and mechanically ventilate patients.

Endotracheal Tube is made from a special non toxic PVC coated with silicon elastomer which forms a bonded film over this tube and balloon.

ET Tube is 100% Phthalate free.

ET tube is coated with non-stick, self-lubricating Silicon elastomer (Elastosyl) which forms a thin film on the surface.

Elastosyl reduces the coefficient of friction by 80%, Reducing trauma significantly.

Elastosyl coating forms a non-stick layer on the balloon preventing it from sticking to the trachea.

Elastosyl offers 100 % more bio-compatible surface to the tube and is much safer for the body.

Low pressure high volume cuff provides excellent seal.

ET Tube is for single patient use.

We are Manufacturer, Exporters and Suppliers of Endotracheal Tube Plain Elastomer Coated at wholesale competitive prices from India.
