

Labycare-Endotracheal Tube Cuffed PVC (SKSS-MD06)

Endotracheal Tube Cuffed PVC Manufacturer by LABYCARE

Description :

Endotracheal Tube is also known as ET Tube.

Endotracheal Tubes Cuffed is used as a passage for gases to flow between patients lungs and anaesthesia breathing system.

ET tube protects the lungs from contamination from gastric contents and nasopharyngeal matter such as blood.

This tube is attached with non-return valve with indicator to facilitate the cuff inflation and deflation.

The thin smooth cuff inflates symmetrically eliminating any risk of herniation.

The terminal end is suitable for 15mm connector.

Latex free.

Paper Poly Packing.

ETO Sterile.

ET Tube is for single patient use.

We are Manufacturer, Exporters and Suppliers of Endotracheal Tube Cuffed PVC at wholesale competitive prices from India.
