

Labycare-Compact Digital Data Logging Moisture Meter (SKSS-MTE2001)

Compact Digital Data Logging Moisture Meter Manufacturer by LABYCARE

Description :

A Compact Digital Data Logging Moisture Meter is a portable instrument used to accurately measure and record the moisture content of seeds, grains, and agricultural products. It features a digital display, built-in memory for data logging, and quick measurement capability. The device ensures reliable moisture monitoring for quality control during storage, processing, and laboratory testing.
