

Labycare-Universal Digital Moisture Meter (SKSS-UDMM2002)

Universal Digital Moisture Meter Manufacturer by LABYCARE

Description :

A Universal Digital Moisture Meter is a portable device used to measure the moisture content of seeds, grains, pulses, and other agricultural commodities quickly and accurately. It features a digital display and pre-calibrated settings for different crops, ensuring reliable results. The meter is widely used in seed testing laboratories, grain storage facilities, and processing plants for quality control and proper storage management.
