

Labycare-Dot Matrix Ink Ribbon Printer (Product Cat # SKSS-MTE2009)

Dot Matrix Ink Ribbon Printer Manufacturer by LABYCARE

Description :

A dot matrix ink ribbon printer is a type of impact printer that operates by using a print head with tiny pins to press against an inked ribbon, imprinting characters onto paper. In contrast to thermal printers, which rely on heat to generate images on specialized heat-sensitive paper, dot matrix printers utilize a mechanical impact method. This makes them ideal for applications that require multi-copy printing and durable, long-lasting prints.

Specifications :

- The ink ribbon cassette is easily replaceable.
 - Printing paper of standard width 5.75 cm.
 - Printer is able to print following:
 - a) Date
 - b) Name of Commodity
 - c) Moisture Percentage
 - d) Temperature
 - e) Depositor's Name
 - Power Supply:-Through 5V/2A, DC Adaptor
-
