

Labycare-Portable Humidifier (SKSS-SLE2032)

Portable Humidifier Manufacturer by LABYCARE

Description :

It is made of stainless steel. It is used for producing humidity with high efficiency. There is one big container on lower side in which motor cum pump is fitted in the center. There is also provision for providing water through tube inside container. The level of water can be maintained by means of water leveler. On the top there is a dome like structure fitted with carrying handle.

Working: Connect the main lead with AC 220V $\pm$ 10 % 50 Hz supply. Now pour the water inside container through water inlet via rubber tubing. Now switch on, water will go up through pump. The fan will circulate the humid air in the room.

Specifications :	Evaporation	: 3 –
	Rotating Disc	: Sp
	Operation	: At
