

## Labycare-ADVANCED ANALYSIS KIT ( SKSS-SLE2033)

ADVANCED ANALYSIS KIT Manufacturer by LABYCARE

### Description :

This kit is a compact, versatile tool frequently used during grain procurement to check the quality of food grains. It can also be used alongside a seed grader to assess the proportion of various impurities such as shrunken and immature grains. All items are neatly packed in a compact wooden box with a carrying handle for ease of transport. The kit is applicable to all types of seed grains, including cereals, oilseeds, pulses, vegetables, and forestry seeds. It is ideal for analyzing grain lots and measuring the fractions of shrunken, shriveled, broken grains, mud balls, stones, infected grains, undersized seeds, lightweight chaff, straw, immature grains, and hollow grains.

**Specifications :** Handy moisture meter
