

## Labycare-SEED COATING/PELLETING MACHINES (SKSS-SLE2063)

SEED COATING/PELLETING MACHINES Manufacturer by LABYCARE

### Description :

In seed technology, methods such as seed coating and seed pelleting are employed to enhance seed quality and facilitate easier planting—especially for crops with small seeds.

Seed coating involves applying a thin film or layer to the seed surface, typically used to deliver active ingredients like nutrients, fungicides, or insecticides. In contrast, seed pelleting encases the seed in a larger, rounder, and more uniform inert material, making it easier to handle and plant with precision.

**Specifications :**

- Chromium coated rotor.
- Chromium coated stator.
- 2x mixing blades.
- Speed regulation of rotor.
- Country of origin: Federal Republic of Germany.
- Measurements: 480 x 600 x 750 mm.
- Weight: 66 kg.
