

Labycare-Automatic Sealing Machine (SKSS-PMHE2071)

Automatic Sealing Machine Manufacturer by LABYCARE

Description :

An Automatic Sealing Machine is used for continuous sealing of filled bags or pouches in packaging lines. It uses a heated sealing band and conveyor system to seal plastic, laminated, or paper bags efficiently. The machine ensures strong, uniform seals and improves packaging speed in seed, grain, and food processing industries.

<u>Specifications :</u> Control	PLC
Process	Mould closing-material injection-cooling-seal ejection
Threaded seal size	Dia 14mm,thick 5mm
Provision of Mark	On both sides of plastic seal
Temp. controller	Digital to set plastic material temperature.
Portability	Mounted on four wheels
Capacity	180-200 bags/hour & more
Overall dimension	1333 x 610 x 1755mm (W x L x H) (approx).
Gross weight	260 kg
Electrical drive	0.7KW. 440 v 50 Hz, AC
Power consumption	2.3KW
Plastic Seal	PP
Monogram	Monogram of department
Power Supply	440V Three Phase
