

Labycare-Manometers Various (SKSS-MD2013)

Manometers Various Manufacturer by LABYCARE

Description :

Manometers are devices used to measure pressure of gases or liquids in medical and laboratory applications. They provide accurate readings for monitoring physiological or system pressure. Commonly used in hospitals and research labs, they ensure reliable performance and precise measurement in various diagnostic and experimental procedures.

Specifications :

Type: U-tube / Digital / Mercury / Aneroid

Measurement Range: As per model

Units: mmHg / kPa / cmH₂O

Material: Glass / Metal / Plastic

Accuracy: High precision

Mounting: Wall/stand compatible
