Labycare-Muscle Grip (SKSS-MD2023)

Muscle Grip Manufacturer by LABYCARE

Description :

Muscle grip is a laboratory instrument used in physiology experiments to hold muscle tissues securely during recording or stimulation. It ensures firm attachment without damaging the tissue, allowing accurate observation of contractions. Commonly used with kymographs and levers, it supports reliable and controlled experimental procedures.

Specifications :

Material: Stainless Steel / Brass
Type: Tissue holding clamp
Grip: Serrated / smooth jaws
Mounting: Stand compatible
Use: Muscle fixation in experiments

Finish: Polished, rust-resistant
