Labycare-Muscle Chamber (SKSS-MD2026)

Muscle Chamber Manufacturer by LABYCARE

Description :

Muscle chamber is a laboratory apparatus used to hold isolated muscle or tissue in physiological solution during experiments. It maintains proper conditions for tissue viability and allows recording of contractions. Commonly used in pharmacology and physiology labs, it supports accurate study of muscle responses and drug effects.

Specifications :

Material: Glass / Acrylic / Stainless Steel
Capacity: Approx. 20–50 mL
Design: With inlet/outlet for solution flow
Mounting: Stand compatible
Accessories: Tissue holder, aeration tube

Use: Isolated tissue/muscle experiments
