

Labycare-Metravi OS-5020C Dual Channel Oscilloscope (SKSS-MD2066)

Description :

The Metravi OS-5020C Oscilloscope is a dual trace, dual channel analogue oscilloscope designed for accurate waveform observation. It features a built-in component tester, enabling quick testing of electronic components. Ideal for laboratories and educational use, it provides stable triggering, clear display, and precise signal analysis across multiple applications

Specifications :

Dual trace for simultaneous signal comparison
Built-in component tester for quick diagnostics
Stable triggering system for accurate waveform display
X-Y mode for Lissajous pattern analysis

Rugged design suitable for lab and industrial use
