

Labycare-Curcumin Extract Powder Pulvering Machine (SKSS-PC2002)

Curcumin Extract Powder Pulvering Machine Manufacturer by LABYCARE

Description :

The Pulverizing Machine is a high-efficiency device used for grinding curcumin extract and herbal materials into fine powder. It ensures uniform particle size, low heat generation, and preservation of active ingredients. Suitable for pharmaceutical and herbal industries, it offers reliable, hygienic, and continuous grinding performance.

Specifications :

High-speed grinding with fine output
Low heat generation to protect curcumin quality
Adjustable mesh size for desired fineness
Stainless steel body for hygiene

Easy operation and maintenance
