

Labycare-Esico Dissolved Oxygen Meter (Product Cat # SKSS-MD2070)

Esico Dissolved Oxygen Meter

Description : The Dissolved Oxygen Meter by Esico is a precision instrument used to measure dissolved oxygen levels in water. It is widely used in laboratories, aquaculture, and environmental monitoring. The device ensures accurate readings, helping assess water quality and maintain optimal conditions for biological and industrial applications.

Specifications :

- Accurate dissolved oxygen measurement
- Easy-to-read digital display
- Portable and user-friendly design
- Fast response with stable readings

Suitable for laboratory and field use
