

## Labycare-Resistance Box (SKSS-SE027)

Resistance Box

### **Description :**

A Reflection/Refraction kit is a physics learning tool used to demonstrate the behavior of light when it reflects from surfaces and bends through different media. It includes optical components that help students understand laws of reflection, refraction, and image formation through hands-on experiments and clear visual observation.

### **Specifications :**

Product Name	Reflection/Refraction Kit
Material	Acrylic, Glass, Plastic
Components Included	Plane mirror, prism, lenses, ray box, pins
Light Source	LED/Laser ray box
Usage	School & laboratory experiments
Application	Demonstration of reflection & refraction
Age Group	Secondary & higher secondary students
Safety Features	Smooth edges, low-voltage light source
Portability	Compact and easy to carry
