

Labycare-9 Body Mortuary Chamber (SKSSMC9)

The 9 Body Mortuary Chamber is a large-capacity cold storage unit designed for hospitals, forensic centers, and mortuaries. Built with stainless steel and advanced refrigeration, it ensures reliable preservation, hygiene, and energy efficiency. Independent compartments, digital controls, and smooth trays provide safe, long-duration storage with consistent cooling performance.

Description :

The 9 Body Mortuary Chamber is a large-capacity cold storage system designed to preserve up to nine bodies simultaneously under hygienic and controlled conditions. Constructed with premium-grade stainless steel, it offers high durability, easy cleaning, and long service life. Equipped with advanced refrigeration technology, the chamber ensures uniform cooling, energy efficiency, and low noise operation. Each compartment is fitted with individual trays for safe loading and handling, with separate doors to prevent unnecessary temperature loss. Digital temperature controls and reliable insulation provide consistent performance, making it suitable for hospitals, large mortuaries, forensic centers, and medical institutions with high storage requirements.

Specifications :

Capacity:	9 bodies (3 chambers)
Material (Inner/Outer):	Stainless Steel (S)
Insulation:	High-density polyu
Temperature Range:	-2°C to -10°C (ad
Refrigeration System:	Hermetically seale
Control System:	Digital temperatur
Doors:	Individual insulate
Power Supply:	220-240V AC, 50
Noise Level:	Low-noise operati
Mobility:	Heavy-duty castor
Safety:	Over-temperature
