

## Labycare-Foetus skeleton (SKSS-SE055)

Foetus skeleton

### **Description :**

Foetus Skeleton Model is an anatomical teaching aid representing the skeletal structure of a developing human foetus. It shows delicate bones in early stages of growth, helping students understand bone formation and development. Widely used in medical and biology education, it provides clear visualization of prenatal skeletal anatomy.

### **Specifications :**

Type: Human foetal skeletal model

Material: High-quality PVC/plastic

Size: Scaled model (foetal size representation)

Structure: Detailed miniature bones

Mounting: Fixed on base or display stand

Finish: Natural/painted for clarity
