

Labycare-Emergency Scissor (SKSS-AP064)

The trauma shears are designed to cut through heavy materials in a quick, safe and reliable fashion. The serrated blade makes the shears ideal for slicing through clothing, bandages, tape and other materials. The blunt end of the shears keeps patients safe from accidental cuts or slices.

Trauma shears, also known as Tuff Cuts (a brand name), are a type of scissors used by paramedics and other emergency medical personnel to quickly and safely cut clothing from injured people. Bandage scissors are similar in design, though smaller, and are primarily used for sizing or removing dressings and bandages.

We are Exporters and Suppliers of Emergency Scissor at wholesale competitive prices from India.
