Labycare-Vaporizer Enflurane Meditec (SKSS-AP136)

Vaporizer Enflurane Meditec Manufacturer By LABYCARE

Description :

Vaporizer Enflurane Meditec England UK can only fill with Enflurane

Temperature 15 degree Celcius to 35degree Celcius

Humidity 30% to 75% relative humidity

Calibrated at Sea Level

To minimize filling frequency, the vaporizer accomodates 250ml of Anesthetic Agent.

The dials turning easily with small graduations helps to fine tune anaesthesia delivery over the full range of dial setting and flow rates.

Vaporizer Enflurane Meditec is colour coded with Orange Colour and have clear agent level indicators and a tamper proof lable for complete security

Works consistently in altitudes upto 2440m above Sea Level

We are Exporters and Suppliers of Vaporizer Enflurane Meditec England UK at wholesale competitive prices from India.
