

Labycare-Transcutaneous Nerve Stimulator 4 Channel Economy (SKSS-PP337)

Transcutaneous Nerve Stimulator 4 Channel Economy

Description :

Portable Table model unit is microprocessor controlled with LED display.

Unit is mains operated pulse generator "TENS" is used externally for the relief of localised pain.

The unit with four channels can be operated on different patients at a time or can be operated at four locations to a patient.

Wide range of pulse width variations, along with frequency & intensity variability.

Offers great flexibility in a treatment of chronic pain syndromes.

Technical :

Output Channels : Four

Timer : 00 to 60 minutes with Buzzer

Output Voltage : 0 to 100V.(Peak to Peak)

Program Modes : Cont., Burst, PWM-C, PWM-1, SURGE, SWEEP.

Frequency : 2, 20, 40, 80, 120, 150 Hz.

Output Current : 0 to 60 mA.

Accessories :

(a) Carbon Electrode-8

(b) Jelly

(c) Belts : Small, Medium & Large (2 Set Each)

We are Exporters and Suppliers of Transcutaneous Nerve Stimulator 4 Channel Economy at wholesale competitive prices from India.
