

Labycare-Transcutaneous Nerve Stimulator 4 Channel Deluxe (SKSS-PP338)

Transcutaneous Nerve Stimulator 4 Channel Deluxe

Description :

TENS-4 is an advanced microprocessor based, portable, table model electro-therapy unit.

The unit with four channels can be operated on different patients at a time or can be operated at four locations to a patient.

Wide range of pulse width variations, along with frequency & intensity variability, offers great flexibility in treatment of chronic pain syndromes.

"TENS" is used externally for the relief of localized pain.

Technical :

Output Channels : 4 (Four)

Output Current : 0 to 60 mA

Power Consumption : 5watts

Pulse Width : Adjustable from 75 to 360 micro seconds in steps.

Output Waveform : Symmetric (Rectangle shaped pulse)

Treatment Time : Digital Timer 5, 10, 15, and 20 minutes in steps

Display : LCD displays the parameters set-Treatment Time, and the current in the output for each channel.

Frequency : Variable from 1-200Hz

Output Voltage : 0 to 100V (Peak to Peak)

Accessories :

Carbon Electrode, Jelly & Tape.

We are Exporters and Suppliers of Transcutaneous Nerve Stimulator 4 Channel Deluxe at wholesale competitive prices from India.
